VOLCK, Effective, Safe and Easy to Use

Controlling plant pests successfully demands a spray that will not only effectively control pests such as Red Spider, Mealy Bug, Scale, White Fly, and Aphid, but at the same time be safe to use on tender plants. Safety is particularly necessary on tender greenhouse and garden plants. Volck answers these requirements and fewer applications will get results.

Volck is also a pleasant spray to handle and mixes easily with water.

BONNIE PRINCE (H. W.)—Bud small ong-pointed; flower medium size, cupped, double, fragrant, white with tinge of yellow in center, borne in clusters. Very vigorous climber, profuse bloomer in June and occasionally thereafter. Very hardy. Deep red hips one-half inch in diameter.

CHRISTINE WRIGHT (H. W.)—The flowers are double, from three and one-half to four inches in diameter, borne singly and in clusters, of perfect form, beautiful in the bud, and in the fully expanded flower; in color a most refreshing bright wild-rose pink.

CLIMBING AMERICAN BEAUTY (H. W.)—Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty.

CLIMBING WHITE AMERICAN BEAUTY (H. W.)—A hardy disease-resistant variety; vigorous growth and great freedom of bloom. It is much more double than Silver Moon, with but one flower to a stem. Has excellent keeping qualities.

CRIMSON RAMBLER (C. P.)—Bright crimson flowers produced in large clusters of pyramidal form; grand variety for pillars and arches and to train over porches; also makes a fine attractive hedge.

DOROTHY PERKINS (H. W.)—A most beautiful deep pink; the flowers are borne in large clusters of small double blooms and are very sweetly scented; quite first class.

DR. HUEY (H. W.)—Bud medium size; semi-double; borne in clusters of 3 or 4 on good stems; lasting. Color, dark crimson-maroon, of great brilliancy; stamens and anthers light yellow. Blooms continuously for three weeks.

DR. W. VAN FLEET (H. W.)—Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center.

EMILY GRAY (H. W.)—A new yellow climbing Rose with glossy, undulated holly-like foliage. The buds are long and flowers of golden yellow are large and semi-double. A valuable acquisition. Needs winter protection north of Washington, D. C.

EUGENE JACQUET—The earliest and most profuse flowering of all the climbers and of the easiest cultivation. Almost every eye produces a handsome truss of fragrant, cherry-red flowers Eugene Jacquet can be bloomed in February without difficulty. It flowers a week earlier than Tausendschoen or Rosarie under the same conditions and carries handsome, dark green, mildew resisting foliage. It holds the flower unusually long—the color improves with age. Eugene Jacquet should be forced so as to show color ten days before Easter to be at its best for Easter sales.

GARDENIA (H. W.)—Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

HIAWATHA (H. W.)—Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color, it is brilliant ruby-carmine, with a clear white eye and a mass of golden stamens.

JACOTTE (H. W.)—Bud large, orange and yellow; flower large, semi-double, open, cupped, very lasting; deep coppery yellow tinted coppery red; borne, several together, on long, strong stem; fragrant. Blooms profusely in May and June.

JEAN GIRIN (The ever-blooming Dorothy Perkins.)—The flowers are similar in form and color to the pink Dorothy Perkins. The chief merit of this rose is that after giving a mass of bloom in June, unlike the other climbers, it blooms again. Cut off all of the old June blooms to help the plant produce more flowers during the summer and fall.

LADY GAY (W.)—Flowers of a deep cherry-pink, shading on the edge of the petals to a very delicate soft tone of pink.

MARY LOVETT (H. W.)—In this Dr. Van Fleet has brought out another Wichuraiana Hybrid a "White Dr. Van Fleet." This rose has done well and is strongly recommended. Loses foliage early.

MARY WALLACE (H. W.)—This is Dr. Van Fleet's masterpiece. Blooms two or three times during the summer months. A pillar rose supporting itself in a bushy growth 6 to 8 feet high. Bright clear rose-pink with salmon at base of petals. The largest Hybrid Wichuraiana in existence. Seen this year in all its giant loveliness.

PAPA GOUCHAULT (H. Cl.)—A pure crimson red, holding its color under all weather conditions and exceedingly hardy.

PAUL'S LEMON PILLAR (Cl. H. T.)—Pale lemon buds and faint sulphur yellow flowers. Double, well formed and fragrant, strong grower.

PAUL'S SCARLET CLIMBER (H. W.)—Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful climbing Rose. We consider it the most wonderful hardy Climbing Rose.

RED DOROTHY PERKINS, or EXCELSA (W.)—Ornamenta climber which is nearly evergreen; this will assure this lovely pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is deep rosy-red, the tips of the petals tinged with scarlet.

ROSERIE (Pink Tausendschoen)—This is a bright pink form of Tausendschoen. A grand Rose from any standpoint.

SHOWER OF GOLD (H. W.)—The color is a deep golden-yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."

SILVER MOON (H. W.)—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

TAUSENDSCHOEN, or THOUSAND BEAUTIES (H. M.)—The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white, delicate flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring.

THE BEACON (H. Cl.)—Fiery red with distinct white eye.

VEILCHENBLAU, the BLUE ROSE (H. M.)—This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.

WHITE DOROTHY PERKINS (W.)—White Dorothy Perkins, in every way is the equal, if not superior, to Crimson Rambler, as a red, and Dorothy Perkins as a Pink. This Rose has no rival as a white climber.

We recommend Irvington Beauty as the finest pink Geranium ever introduced.

The plants like a rich, porous soil and partial shade and will bloom throughout the summer. It is really one of the most beautiful of summer blooming Begonias and never fails to grow well and bloom freely when bedded out in a partially shaded, moist situation; produces clusters of flowers and buds of a beautiful pink color by the hundred on a single plant during an ordinary growing season. Think of it, a Hardy Begonia, one that stood twenty degrees below zero last winter, and came up and bloomed all summer. So many persons write us asking for plants suitable for shady places. Begonia Evansiana will fill the bill. 85 cents per dozen; \$6.00 per hundred.

TEDDY JUNIOR (The Fern for Every Household.)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

JOHN WANAMAKER ("The Wanamaker Boston Fern")—A "sport" from Nephrolepis Scholzei, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzei, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower; making an abundance of fronds, and is quite distinct from any other Nephrolepis.

ROOSEVELT—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

WHITMANII (The Ostrich Plume Fern.)—The well-known fluffy leaved fern; a popular florists' variety.

WHITMANII COMPACTA ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

SCHOLZEI ("The Crested Fern")—The fronds, like Scottii, stand erect, and with a graceful arch form a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

BOSTONIENSIS ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

GOODII ("The Baby's Breath Fern")—(Good & Reese.)—This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

SCOTTII ("The Newport Fern.")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety.

Century Dahlias

This is an entirely new race of Single Dahlias. We consider today that the new Century Dahlias occupy first place where beauty of coloring and artistic effect is desired. Owing to their immense size, long stems, graceful carriage, combined with their purity of color, or the blending of colors, shades and tints, they entirely outclass all other Dahlias for cut flowers. Keep each variety when cut in a separate vase.

Our Grand Garden Dahlias

Peony Flowered Dahlias

A new family of Dahlias originating in Holland. The artistic flowers are very large and are best compared with the semi-double Peonies in form. The gayest of all Dahlias for coloring.

CHATENAY—Its beautiful salmon tints form a perfect contrast with the deep green foliage. Strong, sturdy, upright growth and produces its blossoms erect upon good long, stiff, stems. The beautiful golden-yellow center completes the artistically arranged gem and lends an additional charm to this new acquisition. **\$1.35 per dozen; \$10.00 per hundred.**

JOHN WANAMAKER—This is the most beautiful of all Dahlias, having a formation entirely its own in its charming irregularity. The flowers are alike, and yet not exactly alike, one of its charms. Violet mauve or soft lavender. Awarded first prize as the best pink Dahlias any class, by the American Dahlia Society at the New York exhibition. The plant is a strong, vigorous, branching grower, and the earliest, most constant and profuse bloomer. **\$1.15 per dozen; \$8.00 per hundred.**

A New Introduction The Korean Chrysanthemum

(Chrysanthemum Coreanum)

A remarkable new perennial of iron-clad hardiness from Korea, forming fine large clumps 2 to 3 feet in both height and diameter. The large white flowers have golden centers, resembling a glorified Oxeye Daisy, the petals often turning to a light claret pink.

It blooms in the greatest profusion in late October to early December, when autumn leaves are falling, and thus it keeps the garden bright and cheerful till the early snow flies. Of easiest possible culture, thriving in any good garden soil.
